## SUMMARY

I like to break things apart and put them back together, which is probably why I love Legos and IKEA furniture so much. I am motivated by solving puzzles of all kinds and am not against accepting Choco Tacos as payment.

## INTERESTS

sharks, ocean things

gaming, modding

playing, composing

## WORK EXPERIENCE

### Sr. Software Engineer, Trello — 2017-2020

**Building** and improving core features and components for an optimized and flexible user experience; finding opportunities to improve accessibility patterns and create a more equitable experience for all users.

**Leading** initiatives and cross-functional design system efforts to incorporate component and style APIs to reduce friction between developers and designers; resulting in visual and functional parity across multiple technical stacks and reducing technical debt through documentation.

**Architecting** internal tools used widely across teams to improve build times, prevent regressions, and engage engineers in best practices of delivering high-quality and hygienic code.

### Engineer, Dropbox — 2015-2017

**Constructed** and executed A/B tests on high-volume / revenue pages to improve user interaction resulting in impactful lift and monetization.

**Created** affirming environment for LGBTQ/POC employees through employee resource groups and public speaking at conferences.

**Mentored** and onboarded new hires in social and technical aspects to promote long-term growth and inclusion.

### Engineer, ZURB — 2014-2015

**Assisted** in the launch of the web's first framework for responsive web apps: Foundation for Apps.

**Developed** a codebase for the Foundation platform (Sites, Emails, and Apps) in AngularJS and Ruby on Rails.

**Taught** classes on progressive design principles and fostered relationships with the Foundation open-source community and contributors.

## EDUCATION

### Washington University in St. Louis: St. Louis, MO — 2008-2012

**B.S. in Systems Engineering**, Minor in Public Health

## SKILLS

**Programming:** JavaScript (React, Node), GraphQL, Python, Ruby on Rails, PHP

**Testing:** Jest, Jasmine, Selenium, Mocha, RSpec, Capybara

**Design:** Photoshop, inDesign, stick figures, latté art

**Etc:** Fluent in Korean, proficient in Spanish & French, makes pretty good playlists
